

An abstract digital graphic featuring concentric circles and binary code (0s and 1s) in shades of blue and teal, set against a dark background. The circles have a pixelated or mosaic-like texture.

Driving Business Performance
Data Management in the
Financial Services Value Chain

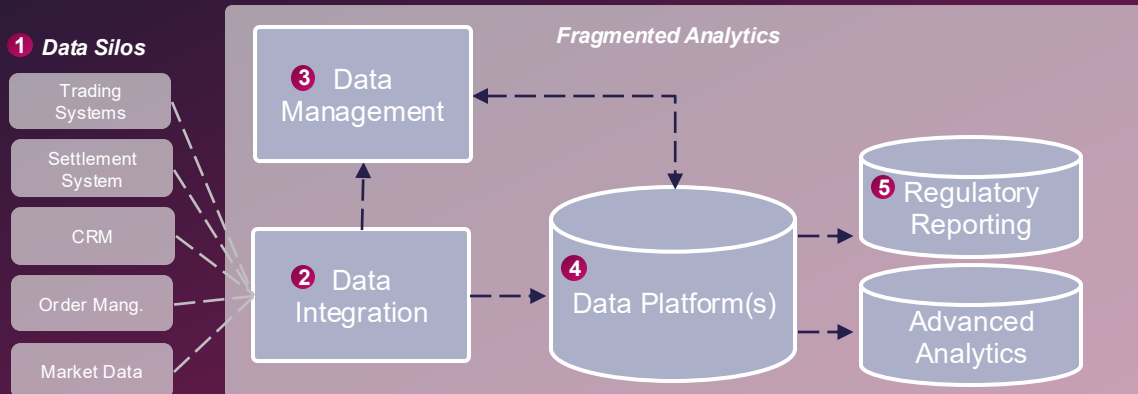

► Data Management in Financial Services: Overview

80% of data governance initiatives are projected to fail by 2027 despite **digital and market regulations that can penalise organisations for a lack of data quality e.g. regulatory reporting***

*Gartner, Gartner Predicts 80% of D&A Governance Initiatives Will Fail by 2027, Due to a Lack of a Real or Manufactured Crisis, 2024

Problems with the Data Value Chain

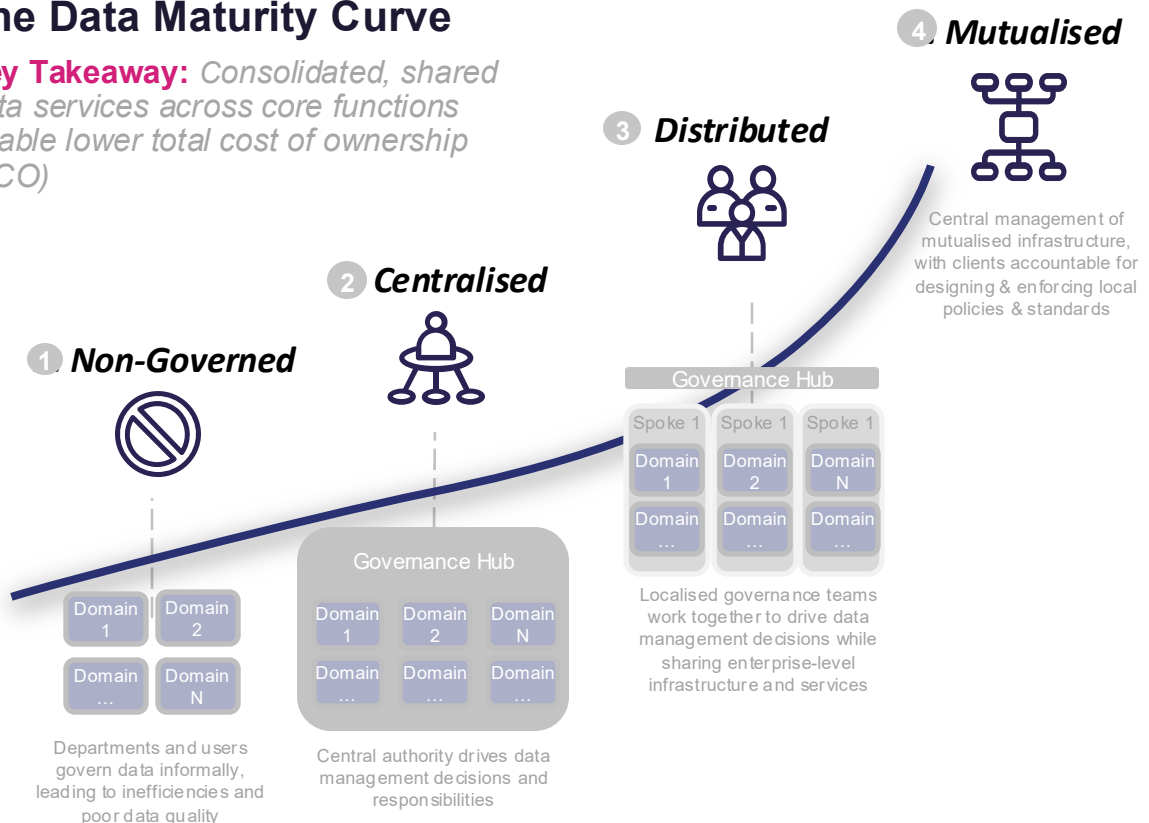

- 1 **Data Quality:** data quality protocols needed to ensure consistency and validity at entry into source systems
- 2 **Data Remediation:** Unscalable data architectures handling complex data volumes and processing needs
- 3 **Data Management:** ineffective data management patterns e.g. consolidated, centralised, or registry for MDM
- 4 **Analytics Architecture:** common enterprise data models needed to query and interpret data across systems
- 5 **Regulatory Pressure:** increased compliance remit and complexities that are dependent on data management

Maturity

The Data Maturity Curve

Key Takeaway: Consolidated, shared data services across core functions enable lower total cost of ownership (TCO)

Data Governance Models

► Delta Capita Offering: **SME-led Advisory and Data Transformation Services**

Our Data Management Solutions

Establish effective governance models

Benefit from an effective data governance strategy and **outsource or automate data management processes** that do not drive competitive advantage i.e. non-differentiating

Reduce TCO with shared data management

Establish **shared data management functions** to control and manage data quality, and remediation activities across business service lines while reducing total cost of ownership

Ensure data quality assurance across systems

Deploy the centralised data quality management over enterprise data infrastructure, **eliminating reactive data remediation** and reducing the risk of data breaches and reporting inaccuracies

Work with our industry SMEs

Consulting and Advisory

Accelerate governance alignment, data discoverability, and improve data management efficiency across multiple functions by working with our qualified data management experts

Data, Technology, & AI

Our dedicated data professionals and enterprise-grade technology partners enable you to accelerate time-to-value by **bringing you best-in-class data management tooling**

Research & Innovation

Our innovation professionals and mutualised services functions enable you to reduce cost base by **bringing you market leading managed services**
