

Delta Capita | Our Tech Consulting Practice

Why Now

54%

of organisations report their last significant outage cost over \$100,000
UpTime Intelligence (2024)

31st March 2025

UK firms must already operate within impact tolerances for critical services
FCA (2025)

\$5.4bn

lost in days from a single global IT failure in 2024
World Economic Forum (2024)

Client Challenges

Tech Strategy

"Our core platform is 15 years old, and every change takes 6 months to release."

- Technology landscape assessment and target-state architecture definition
- Legacy modernisation roadmaps with migration patterns
- Microservices decomposition and domain-driven design workshops

Delivered an 8-week assessment for a Tier 1 global bank, identifying digital solutions supporting over 200 staff and securing multi-million-pound budget

DC Client Engagement: Global Investment Bank

Apps & Integration

"We have 200+ integrations, and no one knows which ones will break if we change anything."

- Enterprise strategy: catalogue, governance standards and developer portal build
- Legacy middleware rationalisation and integration-layer consolidation
- Tooling Comparison Matrix benchmarking 15+ app development platforms

Delivered strategic technology transformation for automating 300+ indexes across four business lines over a 5-year transformation timeline

DC Client Engagement: Market Infrastructure

AI-Enabled Dev

"After 12 months our solutions are out of date - requirements change faster than we can build"

- Low-code/no-code platform assessment aligned to enterprise architecture
- AI-enabled rapid application development with 2-week demo cycles
- Test Automation suite pre-configured for financial services

Designed and delivered interactive, MI dashboards and an end-to-end attestation workflow, optimising the user experience using low-code tools

DC Client Engagement: Challenger Bank

Cloud First

"The board approved cloud-first two years ago but every new project still ends up on-prem."

- Production deployment with user developer enablement and governance
- Cloud-native application design on Azure with Infrastructure-as-Code
- FinOps governance and cost-optimisation frameworks from day one

Delivered a cloud-ready MI solution over 10 months, establishing a scalable op model aligned to AI governance standards

DC Client Engagement: Challenger Bank

What we do

Case Study

Why Delta Capita

65+ Clients

1,100+ Global FS Professionals

Ranked Platinum by Consultancy UK for FS Consulting

✓ **Embedded Delivery** Engineers sit inside client teams, not alongside - reducing handoffs and accelerating delivery

✓ **FS-Native Accelerators** Pre-built deployment templates, API design standards and cloud landing zones purpose-built for FS

✓ **Regulatory-Grade Engineering** 200+ engagements across FCA, and PRA-driven programmes - we know what good looks like

Let's assess your tech estate with a 30-minute diagnostic, no commitment. | Get in touch: deltacapita.com/get-in-touch
